

The MONSANTO Tribunal

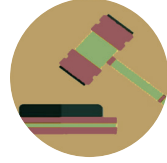

will be held in The Hague from 14 to 16 October 2016,
setting up of an exemplary international tribunal

TO JUDGE the environmental and health damage caused by the multinational MONSANTO pursuant to international law

TO ASSESS MONSANTO's actions in relation to the crime of ecocide. Citizens' movements have made an appeal for international criminal law to recognize this as a crime

TO CONSIDER a possible amendment of the Rome Statute establishing the International Criminal Court to include the crime of ecocide, making it possible to try natural and legal persons for this crime

What can we do ?
